

10 Ways to Help Your Child Improve Their Study Skills

1. Encourage daily studying even if there is no homework. Reviewing lessons increases understanding.
2. Set up a regular study time in a comfortable quiet place where your child won't be distracted.
3. Provide enough supplies and space for your student to get work done. It helps to have a dictionary and computer available.
4. Have your student take notes while reading. This can help make concepts clearer.
5. Give your child a daily planner or a calendar to keep assignments organized.
6. Help your child prioritize tasks. An overwhelming project can be broken down into small steps and completed more efficiently.
7. Suggest that your child attend after-school study sessions or seek extra help from teachers.
8. Assist your child in setting goals and deadlines. Gauging workloads should help prevent cramming and stress.
9. Offer your assistance in the studying process. Read cue cards and give pop quizzes to enhance learning.
10. Be willing to give your child rides to and from study sessions or events that will facilitate learning.

Remember, when you show an interest in education, your teen will, too.
